Professional Summary

I'm a computer science student eager to start my software engineering career. I am highly motivated and self driven. I pride myself in my ability to do high quality work, which has placed me on my school's dean's list for academic achievement.

Skills

- Java • Python • C++ • Bash • GitHub • SQL
 - Familiar with Windows and Linux operating systems.
-

Education

Lakeland University, Wisconsin

Major: Computer Science

Expected to graduate 2025

Projects Projects can be viewed on my website or on GitHub

Hardware Specification Getter – JavaFX application that collects the user's hardware information, which is then displayed in an interactive GUI. Uses Maven to manage dependencies.

Python Image Noise Generator – A GUI application made with Tkinter and PIL that allows the user to generate an image of noise and save it to their computer.

Debian Firefox Install Script – A bash script that automates the process of installing Firefox on Debian based systems using APT.
